Press release draw insert 03/06

## Keep your draws tidy

***Haimer offers the so-called Design cart as an option for the shrink fit machines Power Clamp and Power Clamp Preset. This cart is ideally adapted to fit the devices, both visually and as regards content. The drawers of this cart have wooden inserts in which the accessories can be ordered and stored tidily.***

10

The situation is all too familiar: if there is no order kept in the workplace, it can easily happen that accessories and auxiliary tools lay around the workplace or in drawers all jumbled up and then when one is needed it cannot be found. Help is on its way with the new drawer inserts of the Haimer Design cart.

20 The two options – one for the standard version Power Clamp and the other for the Power Clamp Preset, the version with tool presetting, – are both adapted to accommodate the accessories needed in each case. The wooden inserts have milled edges that conform exactly to the contours of the accessories. So each part has its own place: hand tools, measuring equipment and washer disks, in as far as a spool with washer disks is used. There are even fitted places provided for brush sets used for cleaning the shrink fit bores, the adapter links needed for cooling and the springs needed for presetting lengths.

**B1\_Drawer insert PC.jpg**

- 30 *The new drawer inserts made by Haimer ensure that order is kept at the Power Clamp shrink fit workplace.*

**B2\_Drawer insert PCPreset.jpg**

*There are also new drawer inserts available for the Power Clamp Preset, the shrink fit machine with tool presetting.*
